

## ANTI-SHRINKAGE VACUUM MATTRESS NEXUS

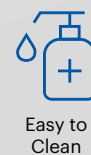

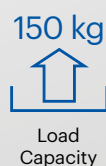

### FEATURES

- Built in **robust, non-absorbent** and **self-extinguishing fabric**
- The hollow space between the 2 nylon-coated sheets is stiffened with **a light but rigid marine multi-layered sheet**, which provides anti-shrinkage properties and offers better support to the patient
- Thanks to the wooden support, NEXUS can be transported by only **two operators**
- **8 reinforced handles and buttonholes around its perimeter** can be used as harness for restraint belts or for transport
- **Extremely resistant on/off valve** is made of chromed brass with a built-in fitting for rubber tubes.

**NEXUS** is an anti-shrinkage vacuum mattress. It is the only one that can be transported by only two operators without compromising the stabilisation of the patient – even when the body is immobilized on a spine board. This is possible thanks to a wooden support that confers rigidity and anti-shrinkage properties.

1. The two lower and upper chambers are made with a special nylon material coated with poly-vinyl.
2. 5 granule filled canals give form to the internal air chambers, ensuring simple and effective positioning.
